

Options & Upgrades for 21st Century Sprinter PHC Delivery System

Green Pro is committed to continuous improvement. And that improvement is based on feedback from our most ardent supporters, the spray technicians. We are rolling out the latest upgrades and improvements to what many have told us is the most advanced, inclusive, and forward-thinking spray system available today.

- 1. Njekt Soil Injection System** - Based on Arborist's field reports, this tool blows the competition away. Make \$1,000's of additional dollars per day with this super producer.
- 2. Additional Hose Reel** - Add an additional 1/2" or 5/8" reel to the rear or the side of your Sprinter.
- 3. Remote Rewind** - Make life easier and faster. Push a button from up to 400' away to rewind your hose.
- 4. Hatz Diesel** - 14 HP engine with Delta 100 26 gpm pump at 560 psi.
- 5. 80-Gallon Tank** - Another tank always comes in handy.
- 6. High Velocity Fan** - 1500 RPM helps keep fumes out of your truck and your equipment cool. Multi-directional. In addition to the thermostatically controlled van included in the base price.
- 7. The Closet** - Be amazed at the almost unimaginable amount of floor to ceiling storage. Pails, Jugs, Tips & Pour - almost anything you take has a place in this 6-tier locker with adjustable shelves.
- 8. Yanmar 3-Cylinder Diesel** - Work until the end of time, or at least until you retire. Connects to Sprinter fuel tank and powers a Delta 140 36 gpm pump at 700 psi. Unlimited, quiet smooth power is well worth the investment.

Njekt Soil Injection System

Remote Rewind & Additional Hose Reels

Hatz Engine

80-Gallon Tank

High Velocity Fan

Yanmar Engine

The Closet
